

COMPUTER TECHNOLOGY
 OBJECTIVE 0206
General Computer Terminology

Types Of Computers	Computer Components: Hardware	Computer Components: Software
Desktop microcomputer Workstation Laptop or Notebook Supercomputer Mainframe Server Handheld	System unit CPU Circuits Silicon chip mHz Pentium RAM ROM Bit Byte	Program Operating system software Folder Multitasking GUI (Graphical interface) Platform Icons Menus Application software
Computer Performance And Processing	Kilobyte Megabyte Gigabyte Terabyte	Viruses And Destructive Programs
Boot process Input Base 2 binary code Data Information Output	Storage devices Magnetic storage Optical storage Laser Medium/media Hard disk Floppy disk Write-protected Formatted Zip disk Digital audio tape CD-ROM CD-R CD-RW DVD-ROM Input devices Output devices Resolution Pixels Peripheral devices	Boot sector virus File virus Macro virus Trojan Horse Time bomb Worm Logic bomb Attachments
		Networks
		File server LAN Intranetwork WAN Internetwork IP address
